

Handout 1: Discussion Questions for Participants

The following questions are provided as pegs for the webinar discussion. Please come prepared to talk about them. The handouts are designed to help you participate in the discussion more effectively.

a. What are the angles/aspects of interest to you in this project, particularly on the role of ICT-mediation in citizen voice and participation? What would you like to explore and find out better (eg. exclusion/inclusion dimensions of citizenship; thick versus thin participation, 'code is law'; 'digital as default' etc.)?

b. What concepts from the structuration framework shared with you do you find useful in your study? What would you add to this understanding?

c. What innovative methods (webometrics, back-end analysis, social network analysis, visual data analysis, etc.) would you like to explore? What insights do you think it will yield on the government initiative/citizen voice?
